

Sophos UTM Licensing

Choose the license and modules you need
to get the best from our UTM

- ▶ Helping you get started with an entry-level license
- ▶ Flexible deployment options: hardware, virtual appliance, software or to the cloud
- ▶ Pick the modules you need and add them when you like
- ▶ Use any UTM feature on any hardware
- ▶ Take advantage of a free network firewall

Protection modules or FullGuard

Choose the modules you need

We've designed a set of modules that you can subscribe to individually for your UTM. Or you can get them all in a single FullGuard license.

Network Protection

Sophos Network Protection includes many fully integrated features. Get an intrusion prevention system, denial-of-service protection, a VPN gateway, an HTML5 VPN portal, advanced routing and more. We help protect your network by keeping bad traffic out and enabling secure access to authorized users.

Email Protection

Sophos UTM Email Protection makes it easy to keep your inboxes clear of viruses and spam. We give you accurate, high-capacity mail filtering and email encryption. And you can ensure your employees properly encrypt their email, preventing possible data loss. Our handy management tools make life easier for you and your users.

Web Protection

The web can threaten productivity and introduce malware to your network. Sophos Web Protection prevents malware infections and gives you control over employees' web use. Spyware and viruses are stopped before they can enter the network.

You create easy policies that set where and how employees spend time online. Everything is tracked and arranged in detailed reports so you can see what people are doing and make changes as needed.

Web Server Protection

Attackers can easily take advantage of your web server's weaknesses to steal data, obtain unauthorized access and infect systems. They simply have to do something the web server doesn't expect. Manually protecting the web server against these threats requires specialized expertise.

Sophos Web Server Protection eliminates this need. We use a reverse proxy to protect your web server and web applications against the unknown. A clear administrative interface simplifies policy setting.

Wireless Protection

Your wireless networks need the same policies and protection as your wired network. This can be difficult without a way to centrally manage the network and extend your security. We give you these capabilities with Wireless Protection. Now the wireless network is easily managed and protected, ensuring consistency across your organization.

BasicGuard

Getting started with our UTM

If your IT budget is tight, we don't think you should have to compromise on security for your network. BasicGuard is an entry level license offering the essential functions you need to protect your organization. Making sure smaller organizations can still get affordable unified protection.

Essential Network Firewall

The foundations of network security

Our free Essential Network Firewall offers fundamental security functions, helping you protect any business network. Start today and implement a free firewall into your company's IT environment at no charge and with no strings attached. We're providing protection for unlimited IP addresses and the following features without any time limitations.

- ▶ **Networking** Internet Router, Bridging, DNS server & proxy, DynDNS, DHCP server & relay, NTP support and automatic QoS
- ▶ **Network Security** Stateful Packet Inspection Firewall & Network Address translation (DNAT/SNAT/Masquerading)
- ▶ **Remote Access** PPTP and L2TP over IPSec support (including iPhone support)
- ▶ **Logging/Reporting** Full logging on local hard drive, searching, real-time reports for hardware, daily executive reports and network usage and network security
- ▶ **Management** Web-based GUI in local languages, setup wizard, configuration backup & restore, administrator notifications, SNMP support and centralized management via Sophos UTM Manager (also free of charge)

All completely free. [Download it now.](#)

BasicGuard includes everything you get with our free Essential Network Firewall, plus:

Network Protection

- ▶ Filter network traffic using Geo IP to block all activity from a particular country
- ▶ Give users remote access through IPSec
- ▶ Create site-to-site VPNs with IPSec or SSL
- ▶ Connect to your Amazon VPC servers

Wireless Protection

- ▶ Lets you add a single wireless access point for your office managed through your UTM
- ▶ Create hotspots for visitor access through a password or accepting terms of use

Web Protection

- ▶ Set a global policy to filter access to certain categories of websites
- ▶ Scans the web for viruses, including FTP and HTTPS traffic

Email protection

- ▶ Scans incoming emails for viruses
- ▶ Stops spam using our real-time blacklist

Management

- ▶ A single console to manage all the features of your UTM
- ▶ Reporting, logging and quarantine held locally on your appliance

BasicGuard is only available on Sophos UTM 100 and UTM 110 appliances

Endpoint Protection

Keep your users safe by stopping malware and rogue websites, as well as controlling devices attached to computers. There are hundreds of thousands of pieces of new malware detected every day by SophosLabs. Nearly all of these threats target computers browsing the web and devices plugging in to computers.

Sophos UTM Endpoint Protection helps you easily deploy our antivirus software to your computers and set policies to keep them safe wherever and however they're connected. We also let you control which devices can be connected to these computers.

Endpoint Protection can be added as a module to any other UTM license

All you need to do is select the modules you need. The more you subscribe to, the better value you'll get.

	Essential	BasicGuard	FullGuard
Pricing	Free Learn more	Request a Quote	Request a Quote
Modules - Choose the ones you need			
Essential Firewall - Network Firewall, NAT, Native Windows Remote Access	Full	Full	Full
Network Protection - IPSec/SSL VPN, Intrusion Prevention, DoS Protection	Optional	Basic	Full
Web Protection - URL Filtering, Application Control, Dual Engine Antivirus	Optional	Basic	Full
