Microsoft and The Shifting Landscape of Modern Work

Microsoft is the cornerstone of modern business technology. In 2020, the world shifted rapidly to remote work on a global scale, and businesses of all sizes had to quickly find ways to enable remote collaboration while keeping their workers and data secure. As Microsoft adapts their products and programs to support the new emphasis on remote work, the integrated nature of the Microsoft stack will only become more powerful and foundational to every business. To stay relevant, it’s vital for IT providers and technology advisors to build a comprehensive Microsoft technology stack while getting the most out of their Microsoft program participation.

36% of organizations have dealt with a security incident due to an unsecured remote worker

20% of remote workers say their biggest challenge is collaboration and communication

How Pax8 Enhances Your Microsoft Experience

Growing your Microsoft practice is easier than ever with the Pax8 CSP Program. We simplify your Microsoft experience to make it easy to adopt in-demand Microsoft solutions, optimize your Microsoft program, and find opportunities to sell more – all while streamlining the management of your complete cloud tech stack.

- **Expertise** to help you earn more margins, optimize incentives and rebates, and keep up with program and product changes.

- **Modern Marketplace** to easily manage your licenses with consolidated billing, instant provisioning, and integrations with your preferred PSA tool.

- **Education** to elevate your team’s Microsoft knowledge, including Mission Briefing events and Bootcamps for Microsoft 365, Azure, and Dynamics.

- **24/7 technical support** to quickly resolve your Microsoft issues with in-house Pax8 engineers – reducing the need to escalate tickets to Microsoft.

- **Professional services** to help you deploy Azure, harden your Microsoft environment, roll-out remote work tools, and more.
Pax8 CSP Program

**A Blueprint For Your Microsoft Journey**

Whether you’re brand new to Microsoft or already purchasing through another distributor, Pax8 can effortlessly move your seats today. From expanding your existing Microsoft clients and migrating on-prem clients to landing net-new clients, Pax8 enhances your entire Microsoft experience so that you can make more possible for the modern workplace.

Accelerate cloud migration & achieve digital transformation

Enable remote work collaboration

Secure remote workers & ensure business continuity

Power business apps to drive data-based decisions

---

**How to Maximize Every Step of Your Microsoft Journey with Pax8**

2. Guide clients toward digital transformation with Azure and by migrating from on-prem to O365 or M365.

3. Standardize on integrated communication and collaboration solutions for remote work, such as Microsoft 365, Microsoft Teams, and M365 Business Voice.

4. Tell a story about reducing risk (especially in remote work environments) with the security and business continuity features of M365 and Azure.

5. Power modern workflows and data visualization with custom business apps and dashboards through Dynamics 365 and Power Platform.

6. Margin up by offering managed services to harden Microsoft environments, secure remote workers, deploy Azure Virtual Desktop, and build custom apps – Pax8 Professional Services can augment your team on Microsoft projects and services.

7. Expand your team’s expertise through education, skilling, and certifications.

8. Advance even further with Azure marketplace and optimize your Azure practice by leveraging Reserved Instances, Azure Hybrid Benefit, and Data Center Optimization.

M365: Remote Work + Security

Over 30 billion collaboration minutes per day! 3

Designed for the needs of small to mid-sized businesses, Microsoft 365 Business Premium offers a single, integrated technology solution that combines the Office productivity apps users know and love with granular device management and best-in-class security features.

**Empower Remote Teamwork:** With Microsoft Teams as a collaboration hub, M365 empowers your clients to work from anywhere, while Azure Virtual Desktop (AVD) protects remote workers’ data and devices by allowing them to work securely on a virtualized Windows 10 desktop.

**Defend Data, Documents & the Inbox:** Advanced security features add a layer of defense against cyber threats to protect business data, files, and emails.

**Control and Protect Devices:** The device management capabilities of M365 simplify device configuration and deployment, allow full control of company-owned mobile devices, and protect company data on personal devices.

---

**Office 365**

**Productivity**

- **Office Applications**
  - Word, Excel, PowerPoint, Outlook, and more

- **Online Services**
  - Exchange, OneDrive (1 TB), Teams, and more

- **Advanced Services**
  - Exchange Online Archiving

**Advanced Security**

- **External Threat Protection**
  - Microsoft Defender for O365
  - Multi-Factor Authentication
  - Enforce Windows Defender to be on
  - Enforcement of BitLocker to be on

- **Internal Data Leak Prevention**
  - Data Loss Prevention
  - Azure Information Protection

**Device Management**

- **Device Management**
  - Microsoft Intune
    - Windows 10 Credential Guard
    - SSO > 10 Apps
    - Conditional Access
    - Shared Computer Activation

- **Deployment Assistance**
  - Windows Autopilot
  - Azure Information Protection
  - Auto-Installation of Office Apps
  - AAD Auto-Enroll

M365: Collaboration & Communication

Microsoft Teams

Over 115 million daily active users! ³

Microsoft Teams is the hub for collaboration and teamwork inside M365 — integrating chat, video meetings, calling, file sharing, screen sharing, document collaboration, presence, calendaring, and expanded capabilities through customizable app extensions.

Popular Teams third-party app extensions include:

Business Apps: Salesforce, ADP, Zoom, Google Analytics

Project Management: Wrike, Trello

Marketing: HubSpot, Mailchimp, Constant Contact

MSP Tools: GitHub, Zendesk, aJira

Microsoft 365 Business

Voice M365 Business Voice is a modern cloud-based telephony add-on to Microsoft Teams that enables you to make and receive calls from anywhere, on any device. Together, they deliver an all-in-one communication solution.

- **Cloud-based phone system** for reliable and secure calling across your computer, mobile device, and/or desk phone, with advanced features such as call transfer, auto-attendants, and call queues.
- **Built-in audio conferencing** with a dial-in number for up to 250 people per meeting.
- **Included domestic calling plan** — get a new number or migrate existing ones (or bring your own calling plan).

M365 Business Voice Target User Profile

M365 Business Voice is a great fit for employees that do a lot of external dialing, such as a sales reps or teams who often need to interface with external clients and partners.

Microsoft Teams Essentials: Connection and Collaboration for SMB Clients

Microsoft Teams Essentials is a stand-alone offering for small and mid-sized businesses (SMBs) that brings together the best of Teams with meetings, chat, calling, and collaboration. It provides a new entry point into Microsoft 365 ecosystem for businesses with 300 or fewer employees that are specifically looking for rich meetings, calling, and collaboration experiences.

Teams Essentials lets you deliver a full Teams experience to SMB clients without having to deploy the full Microsoft 365 suite, and it’s built for easy implementation. It works seamlessly with on-premises or hosted exchange, integrates with a client’s existing email system, and allows for a single calendar view. It includes access to cloud versions of Microsoft 365 apps and enables file and document sharing among users. It also includes per-user cloud storage for documents and files.

Solutions

Azure: Unlock the Power of IaaS

Microsoft Azure is a growing collection of integrated cloud services used to build, deploy, and manage data and applications through Microsoft's global network of data centers. With more than 90 compliance certifications, including ISO, HIPAA, IRS, and ITAR, Azure also streamlines data compliance.

If your client stores data in a legacy system or if they need a better way to analyze data from current cloud applications, migrating those workloads to Azure creates a new revenue stream for you and a single source of truth for mission-critical business data. Unfortunately, data migrations can be costly without the right tools or expertise and Azure can seem daunting due to the complexity of its 20,000 SKUs and usage-based billing model.

Adopt and Unlock the Power of Azure though Pax8

Pax8 has the deep Azure expertise necessary to help you develop an Azure practice. Our two-day Azure Bootcamps help partners navigate the complexities of adopting and selling Azure, while the Pax8 Marketplace simplifies Azure management through:

- **Predictive cost analytics** calculates data to enable optimization of techniques and strategically lower costs.
- **Threshold management** notifies you when approaching customized, consumption-based thresholds.
- **Detailed billing** shows your clients' granular billing data.

Additionally, Pax8 Professional Services can assist you with any Azure deployment, AVD implementation, or data migration project! With the help of our team of cloud infrastructure architects, you can leverage the power of Microsoft Azure with your clients to ensure regulatory compliance and improve data governance.

- Extend on-premises Active Directory to cloud-based Active Directory
- Enable MFA & SSO through identity management
- Migrate existing or new services to Azure
- Leverage Azure for disaster recovery and backup
- Harden Azure with Azure Defender for Servers
- Design and architect Azure environments
Solutions

Azure: Going Further with AVD, RIs, and DCO

Azure Virtual Desktop (AVD) + Nerdio

AVD (which is included with M365) enables central management and security of users’ desktops by creating Windows 10 virtual desktops in Azure, allowing end users to work remotely with a secure connection and securely store data in the cloud rather than on their local device. AVD separates the computer environment from user devices, greatly reducing the risk of confidential information being left on a personal device.

Pax8 works with industry leader Nerdio to help partners easily estimate costs, automate, manage, and optimize AVD deployments.

Azure Reserved VM Instances + Azure Hybrid Benefit

Partners can realize major discounts on virtual machines by moving from a pay-as-you-go model to 1-year or 3-year commitments on reserved VM instances (RIs). By reserving VMs in advance, you can better manage costs across predictable and variable workloads – improving your forecasting with a single upfront payment or lowering your upfront cash investment with monthly payment options. You’ll still have the flexibility to exchange or cancel reservations should your needs evolve.

You can achieve even deeper discounts by stacking RIs with Azure Hybrid Benefit, which allows you to maximize license investments by utilizing existing on-premises Windows Server licenses or purchasing them through Pax8 for your Azure deployment.

Pax8 Infrastructure Solutions Consultants can help you select the right VM solution to achieve the greatest savings, determine when RIs and Azure Hybrid Benefit are relevant to your project, and build go-to-market strategies.

Date Center Optimization (DCO) Program

Partners with a mature Azure practice and an upcoming data center migration project should look into Microsoft’s Data Center Optimization program through Pax8. This program helps partners reduce cost and risk, and accelerate migrations to deliver client success. Participants commit to an Azure revenue spend to gain the benefits of:

• Significant offers and incentives
• Engineering escalation support
• Azure deal support and review
• Microsoft tools for building deals, aligning workloads, and planning migrations

If you’re interested in the DCO program, reach out to your Pax8 account manager to qualify!
Solutions

Dynamics 365 / Power Platform: Business Apps

With the process automation capabilities of the Microsoft Dynamics 365 Power Platform, you can now take direct control of workflows and customize solutions for your clients’ business challenges. With pre-built templates, 275+ connectors, and “record, point, and click automation”, Power Platform enables you to easily build apps, automate workflows, and analyze data to activate digital selling and drive data-based decision-making across all departments.

- **Power BI** creates dashboards for powerful data visualization.

- **Power Apps** makes it easy to modernize processes by building apps with little or no code, across any system (on-premises or cloud) on the platform they use today.

- **Power Automate** improves productivity and reduces manual processes with workflow automation.

- **Power Virtual Agents** helps businesses respond rapidly to customer and employee needs—at scale—using intelligent chatbots.

Services

Professional Services
For Microsoft

For Microsoft projects that are too time-consuming or complex to tackle alone, partners can take advantage of Pax8 Professional Services.

Our team of highly skilled Cloud Engineers help Pax8 partners plan, assess, design, migrate, customize, and optimize cloud solutions. All Pax8 Professional Services are white-labeled, so your clients never know we’re involved. Plus, with partner-focused pricing, our Professional Services add capabilities and bandwidth to your team, which translates to increased margins on Microsoft projects.

M365 Enablement

M365 Hardening Bundle: Increase overall security posture by enabling Advanced Threat Protection and turning up auditing capabilities in M365. Configure security best practices and Azure AD MFA.

Azure Architecture & Enablement
- Azure Deployments
- Azure AD Connect Setup
- Hands-On Technical Training Labs

Migration Services
- On-Prem Exchange to Office 365 or Microsoft 365
- Hosted Exchange to Office 365 or Microsoft 365
- G-Suite to Office 365 or Microsoft 365
- On-Prem to Azure
- Teams / SharePoint / OneDrive

Security
- Intune Advisory & Implementation
- Hardening Office 365
- Maas360 Advisory & Implementation

Optimize + Enhance

Make the Most of Your Microsoft Program

We believe in rewarding Pax8 CSP partners for driving the activation and enablement of Microsoft clients. As your Microsoft experts, we’ll show you how you can earn additional margins on net-new Microsoft clients and navigate the Microsoft incentives and rebates requirements. Here’s your checklist:

1. Attain a Silver or Gold membership and select a competency area.
2. See the list of available Microsoft incentives.
3. Actively sell with a valid Microsoft Cloud Reseller Agreement.
4. Complete onboarding to the CSP incentives tool.

The Microsoft Incentives/Rebate structure changed on January 1, 2020. Read this guide to learn more.

Don’t Leave Money on the Table from Microsoft!

Our Pax8 Microsoft experts created a guide to clear up the confusion around competencies, incentives, and rebates.

A Modern Partner Experience

Pax8 simplifies the way organizations buy, sell, and manage cloud solutions, empowering our partners to achieve more with cloud technology. Our born-in-the-cloud marketplace modernizes the channel’s cloud journey with consolidated billing, automated provisioning, and industry-leading PSA integrations. And our technology is backed by our world-class partner experience that provides responsive support alongside the education and resources you need to grow your cloud business.

Ranked in the Inc. 500 for three consecutive years — #68 in 2018, #60 in 2019, and #111 in 2020 — as one of the fastest-growing private companies in the US, and ranked #1 on the Denver Business Journal’s Fast50 list as the fastest-growing large business in Denver, Pax8 has displaced legacy distribution by connecting the channel ecosystem to our award-winning cloud marketplace. If you want to be successful with cloud, you want to work with Pax8.
Your Microsoft Experts
Do it All in the Pax8 Marketplace

Our dynamic marketplace helps partners seamlessly deliver and manage cloud solutions. Quote, order, bill, and provision all of your cloud products in one place, with a single monthly invoice. And, with built-in data analytics and business intelligence, the Pax8 Marketplace provides the insights you need to optimize your margins and sell more.

Ordering
Buy Microsoft and other cloud products instantly from one place with the intuitive ordering workflow of the Pax8 Marketplace.

PSA Integrations
The Pax8 Marketplace integrates with Autotask, ConnectWise, Kaseya, Syncro, Tigerpaw, and RepairShopr — so you can manage everything from the convenience of your preferred PSA tool.

Instant Provisioning
Our marketplace integrates with Microsoft Partner Center – enabling automated, instant provisioning.

Managing Clients
Get a 10,000-foot view of your entire Microsoft client base and manage their overall cloud tech stack within the Pax8 Marketplace.

Channel- Focused Cloud Products
Build your complete tech stack, with leading vendors across productivity, infrastructure, continuity, security, network, and communications.

Business Intelligence
See targeted up-sell and cross-sell opportunities in your client base and identify gaps in your clients’ technology stacks through data visualization.
Want to enhance your Microsoft experience to make more possible for your clients?
